**COMPLAINT:**

Unit needs to be made ready for Auto Steer and a Globe installed.

**CORRECTION:**

Installed 2630 and starfire 3000 globe on tractor, had to install different cab mount for globe and used mount from 9510R on lot. Ran tractor using autotractor to verify operation.

 COMPLAINT:  
 SERVICE REQUEST: FIND OIL LEAK

Technician Comments:  
 Failure mode leak  
 Failure part RE527102  
 Failure area front of engine

Travel to farm to see where the oil was coming from. All the oil was coming from the front of the engine area. I check engine oil to verify that it is in the full markers and it was so I started engine to see if I can find were the leak is coming from. While engine was running I found the leak. It is coming from the front seal on engine. Shut engine off and closed hood. Tractor will have to come to shop for repairs. I came back to shop and made est. and order parts for repairs. Tractor arrived and I clean engine off of oil and dirt. Brought tractor in shop and started to disassemble front of engine. I remove the viss fan driver and damper pulley on crank shaft. I then remove the screws holding the front seal in place. There were two screws that were strip out and I had an issue removing screws from housing. After seal was remove I tap out remaining bolt holes and found only two with bad threads. I call around to see if there was any auto parts store that may have a Hilo coil repair kits. I did find one and repairing threads was cheaper than replacing the cam shaft cover on engine. I tap and installed hilo coil inserts. I then used tools to remove the hub on crank shaft and installed new hub and seal on crank shaft. Used sealant to seal front seal housing and torque all hardware to spec. Assemble remaining parts that were removed in reverse order and torque all hardware to spec. Ran tractor outside to verify that there was no leaks. No leaks were found in test run.

CORRECTION:

 SERVICE ACCESSORIES  
 SERVICE REQUEST: FIND OIL LEAK

TECHNICIAN COMMENTS:  
 FAILURE MODE LEAK  
 FAILURE PART RE527102  
 FAILURE AREA FRONT OF ENGINE

THE OIL LEAK WAS COMING FROM THE FRONT OF THE ENGINE AREA. I CHECKED ENGINE OIL TO VERIFY THAT IT IS IN THE FULL MARKERS AND IT WAS, SO I STARTED ENGINE TO SEE IF I COULD FIND WHERE THE LEAK WAS COMING FROM. WHILE THE ENGINE WAS RUNNING I FOUND THE LEAK; IT WAS COMING FROM THE FRONT SEAL ON THE ENGINE. SHUT THE ENGINE OFF AND CLOSED HOOD. TRACTOR WILL HAVE TO COME TO SHOP FOR REPAIRS. I CAME BACK TO SHOP AND MADE EST. AND ORDER PARTS FOR REPAIRS. TRACTOR ARRIVED AND I CLEANED ENGINE OFF OF OIL AND DIRT. BROUGHT TRACTOR IN SHOP AND STARTED TO DISASSEMBLE FRONT OF ENGINE. I REMOVED THE VARIABLE FAN DRIVER AND DAMPER PULLEY ON THE CRANK SHAFT. I THEN REMOVED THE SCREWS HOLDING THE FRONT SEAL IN PLACE. THERE WERE TWO SCREWS THAT WERE STRIPPED OUT AND I HAD AN ISSUE REMOVING THEM FROM THE HOUSING. AFTER SEAL WAS REMOVED I TAPPED OUT THE REMAINING BOLT HOLES AND FOUND ONLY TWO WITH BAD THREADS. I CALLED AROUND TO SEE IF THERE WERE ANY AUTO PARTS STORE THAT MAY HAVE A HILO COIL REPAIR KIT. I DID FIND ONE AND REPAIRING THREADS WAS CHEAPER THAN REPLACING THE CAM SHAFT COVER ON ENGINE. I TAP AND INSTALLED HILO COIL INSERTS. I THEN USED TOOLS TO REMOVE THE HUB ON CRANK SHAFT AND INSTALLED NEW HUB AND SEAL ON CRANK SHAFT. USED SEALANT TO SEAL FRONT SEAL HOUSING AND TORQUE ALL HARDWARE TO SPEC. ASSEMBLED REMAINING PARTS AND TORQUE ALL HARDWARE TO SPEC. I RAN THE TRACTOR OUTSIDE TO MAKE SURE THAT THERE WEREN'T ANY LEAKS.
