GEN1- Retail

COMPLAINT:

WHITE SMOKE AT EXHAUST.

Technician Comments:

Cust. brought in and said exhaust was smoking too much. Started and ran and found that tractor was burning oil. Pulled injectors and ran compression test, found number 4 was low. Pulled engine and pulled off head, found #4 had come apart. Pulled the pistons and sleeves out. Cleaned block and sent the head in. Put in new mains and rod brgs. Put in new piston pins and bushings. Installed new sleeves and pistons. Installed head and torqued. Put in reman. injectors and installed fuel lines. Put exhaust and intake manifolds with new gaskets and hardware. Replaced water pump and thermostats while eng. was out. Put in new front and rear main seals and new dampner. Put engine back on and torqued bolts. Put on new fuel and oil filters. Got eng. running and checked for leaks - ok. Put tractor on the dyno and broke in. Tractor had had 205 HP and no leaks.
