1.0 Summary

Wenck Associates, Inc. (Wenck) was authorized by Gray Plant Mooty, representing Pipeline Foods to conduct this Phase I Environmental Site Assessment (ESA) of the property and improvements located at 100 5th Avenue (Highway 30) and 504 Commercial Street, Ellendale, Steele County, Minnesota (the Subject Property). The Subject Property consists of 3.43 acres occupied by grain processing and storage, with a gravel parking lot and drive areas, and a spur railroad track. Access to the Subject Property is from 5th Avenue. The Subject Property location is depicted in **Figure 1**. A Site Detail Map of the Subject Property is included as **Figure 2**.

This ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Phase I Environmental Site Assessment Process, Designation E-1527-13 (ASTM Phase I Standard) and satisfies standards and practices set forth in 40 CFR Part 312 – Standards for Conducting All Appropriate Inquiry (AAI Rule) for the purposes of meeting the all appropriate inquiries provisions necessary to qualify for certain landowner liability protections under the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. § 9601(35)(B).

Wenck Understands Pipeline Foods is considering purchasing the Subject Property. The conclusions contained in this report have been made to assist Gray Plant Mooty and Pipeline Foods in evaluating environmental conditions at the present time at the Subject Property.

This ESA has identified no evidence of recognized environmental conditions, controlled recognized environmental conditions or historical recognized environmental conditions in connection with the Subject Property, except the following:

- ▲ A release of fuel oil 1 and 2 was reported in January 2005. The file was granted regulatory closure by the MPCA in June 2006. A closure letter does not eliminate the possibility of residual contamination at the site. Based on the regulatory agency closure of the LUAST, this listing is considered to represent a CREC for the Subject Property.
- ▲ Reported releases of pesticides and fertilizer contamination and have been closed by the Minnesota Department of Agriculture, one in June 2007, and the other in April 2009. Based on the regulatory closure status provided, these listings are considered to represent a CREC for the Subject Property.

2.0 Introduction

2.1 PURPOSE

Wenck was authorized by Gray Plant Mooty, representing Pipeline Foods to conduct this Phase I ESA of the property and improvements located at 100 5th Avenue East and 504 Commercial Street, Ellendale, Steele County, Minnesota; the Subject Property. The Subject Property consists of two parcels totaling 3.43 acres occupied by grain processing and storage, with a gravel parking lot and drive areas, and a spur railroad track. Access to the Subject Property is from 5th Avenue. The Subject Property location is depicted in **Figure 1**. A Site Detail Map of the Subject Property is included as **Figure 2**.

Wenck Understands Pipeline Foods is considering purchasing the Subject Property. The conclusions contained in this report have been made to assist Gray Plant Mooty and Pipeline Foods in evaluating environmental conditions at the present time at the Subject Property. In addition, the report is intended to satisfy the requirements of "all appropriate inquiry... consistent with good commercial or customary practice" referenced in the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. § 9601(35)(B).

2.2 SCOPE

This ESA was prepared in accordance with the ASTM Phase I Standard and AAI Rule to identify, to the extent feasible and in accordance with the processes described herein: recognized environmental conditions, controlled recognized environmental conditions, and historical recognized environmental conditions in connection with the Subject Property.

As defined in ASTM E 1527-13, the term recognized environmental condition (REC) means "the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

As defined in ASTM E1527-13, the term controlled recognized environmental condition (CREC) means "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls."

As defined in ASTM E1527-13, the term historical recognized environmental condition (HREC) means "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls."

As defined in ASTM E1527-13, the term business environmental risk means "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."

A summary of the general scope of work for this project is described in the following tasks:

- ▲ **Task I. Records Retrieval and Review of Records:** Wenck obtained publicly available, practically reviewable and reasonably ascertainable federal, state, county and city information about the Subject Property and other properties within minimum established search distances of the Subject Property. These sources were searched for any information about RECs, CRECs, HRECs or business-related environmental risks relative to the Subject Property. This search included a review of Superfund sites; waste treatment, storage and disposal facilities regulated under RCRA; spills or discharges of hazardous substances, toxic materials or petroleum products; and known or recorded landfills; and/or well databases.

- ▲ **Task II. Site Reconnaissance:** Wenck visually inspected the Subject Property to evaluate the Subject Property for any RECs, CRECs, HRECs and business-related environmental risks. The structures and grounds of the Subject Property were observed for filling, subsidence, unusual land or surface forms, colorations, odors, indications of dumping, and evidence of suspect environmental features on the Subject Property such as tanks, drains, drywells, etc. Observations pertaining to adjacent property use were also recorded where such observations pertained to RECs, CRECs, HRECs or business-related environmental risks relative to the Subject Property.

- ▲ **Task III. Interviews of People with Knowledge of the Subject Property:** Wenck interviewed people with knowledge of the history of the Subject Property and of the surrounding properties. Interviews were completed in order to obtain information pertaining to RECs, CRECs or HRECs relative to the Subject Property. Interviewees included the Subject Property owner(s) and occupant(s), as well as local government officials.

Data gathered in the course of performing the above three tasks was used in concert to determine if information from one source indicated the need for additional information from another source.

- ▲ **Task IV. Reporting:** Wenck completed this Phase I ESA by combining the information retrieved through data searches with the observations that were made during the Subject Property reconnaissance and interviews. Photographs were taken to document the overall status and current use of the Subject Property and specific areas of concern.

Any deviations from the scope described in the ASTM Phase I Standard are identified in Section 2.3.

2.3 DEVIATIONS

No intentional deviations from the ASTM Phase I Standard were made in preparing this report.

2.4 LIMITATIONS AND EXCEPTIONS

The results of this study, performed by Wenck, are based on the scope of work defined in Section 2.2, subject to any project-specific limitations or project-specific additional non-scope considerations described herein.

Portions of the Subject Property exterior were covered with snow and ice during the site reconnaissance.

As is the case with any investigation of finite scope, this review is intended to reduce, but cannot eliminate, the uncertainty regarding the potential for RECs, CRECs or HRECs in connection with the Subject Property. Therefore, the possibility of the presence of some localized substances that may be classified as hazardous cannot be ruled out completely. However, it is Wenck's opinion that the conditions observed at the Subject Property are representative of existing conditions at the time of the site reconnaissance.

2.5 SIGNIFICANT ASSUMPTIONS

Wenck assumes that the Subject Property Representative and Gray Plant Mooty and Pipeline Foods have provided accurate information that will assist Wenck in determining appropriate inquiry, including but not limited to actual knowledge, previously prepared reports, environmental cleanup liens, and title review information. In addition, Wenck assumes, for the purposes of the site reconnaissance, adequate information has been provided to accurately establish the physical boundaries of the real property being evaluated.

2.6 SPECIAL TERMS AND CONDITIONS

The purpose of this report is to aid in the environmental assessment of the Subject Property and not to evaluate the structural condition of buildings or other features of the Subject Property.

Wenck has performed its work in a manner consistent with the care and skill ordinarily exercised by members of the environmental profession. The conclusions contained in this report represent our professional opinions. These opinions were arrived at in accordance with currently accepted engineering practices at this time and location.

Wenck assumes no responsibility for the accuracy of information that was obtained from other sources, including, without limitation, regulatory and government agencies, persons knowledgeable about the Subject Property, persons knowledgeable about adjacent properties and vendors of public practice.

2.7 USER RELIANCE

This report has been prepared solely for the information and use of Gray Plant Mooty and Pipeline Foods. Others wishing to rely on the findings of this report, not having a contractual relationship with Wenck, do so without permission and at their own risk. Our professional recommendations made to the addressee(s) are exclusive to that party's disclosed intended or proposed consideration with respect to the Subject Property at the present time.

3.0 Site Description

3.1 USE OF SUBJECT PROPERTY

The Subject Property is located in an agricultural area in the City of Ellendale, Minnesota.

Site Address/Location	<p>Address: 100 5th Avenue East (Parcel 1) and 504 Commercial Street (Parcel 2)</p> <p>County: Steele</p> <p>Township: 105 Range: 21</p>	<p>City: Ellendale</p> <p>State: Minnesota</p> <p>Section: 25</p>								
Property Information	<p>Size: 3.43 acres</p> <p>Property Identification Number: 15-025-4306 15-025-4314</p>									
Improvements	<p>The Subject Property has three commercial/industrial buildings with ten (10) grain storage bins, outdoor grain storage area, gravel parking lot and drive areas, and a spur railroad track.</p>									
Building Information	<table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Size:</th> <th style="text-align: left;">Year of Construction:</th> </tr> </thead> <tbody> <tr> <td>Feed Mill/Warehouse (Parcel 1) 7,804 square feet</td> <td>1938</td> </tr> <tr> <td>Warehouse 1 (Parcel 2) 5600 square feet</td> <td>1940</td> </tr> <tr> <td>Warehouse 2 (Parcel 2) 1008 square feet</td> <td>1940</td> </tr> </tbody> </table> <p>Description: The building on Parcel 1 consists of a feed mill and warehouse. Areas of the building include: offices, warehouse, grain storage, grain drier, and grain elevator. The buildings on Parcel 2 consist of a one-story metal warehouse and three grain storage bins.</p>		Size:	Year of Construction:	Feed Mill/Warehouse (Parcel 1) 7,804 square feet	1938	Warehouse 1 (Parcel 2) 5600 square feet	1940	Warehouse 2 (Parcel 2) 1008 square feet	1940
Size:	Year of Construction:									
Feed Mill/Warehouse (Parcel 1) 7,804 square feet	1938									
Warehouse 1 (Parcel 2) 5600 square feet	1940									
Warehouse 2 (Parcel 2) 1008 square feet	1940									
Use of the Property	<p>Current Use: The Subject Property is an agricultural grain processing and storage facility that is currently in use.</p> <p>Past Use: According to reviewed sources of information, the Subject Property was undeveloped land in agricultural use from at least 1938, when the currently existing commercial building was constructed. The Subject Property was originally used as a feed mill. According to the site representative, a previous occupant of the Subject Property included Central Co-op and Ellendale Co-op. Central Co-op had reportedly operated the site as a dry fertilizer mixing operation in addition to grain storage and grain elevator operations.</p>									
Ownership and Operation of the	<p>Current Ownership & Operation: The Subject Property is owned and occupied by SunOpta, Inc.</p>									

Property

The Subject Property location is depicted in **Figure 1**. A Site Detail Map showing the Subject Property is provided in **Figure 2**.

3.2 CURRENT USE OF ADJOINING PROPERTIES

The following land uses were noted on adjoining properties:

Direction	Description
North	Agricultural cropland
South	Vacant land with a storage building
East	Residential properties beyond Commercial Street and School Street
West	Mainline Railroad Track with Siding followed by residential development and greenspace

3.3 PHYSICAL SETTING

3.3.1 Topography

The Subject Property is generally level and is at an elevation of approximately 1265 feet above mean sea level. Site surface drainage on the northern Parcel 1 is to the east towards the drainage ditch that runs along the east side of the Subject Property. Historic development may have included grading or filling of the Subject Property to improve the location for construction and drainage.

3.3.2 Geology

Shallow bedrock in the vicinity of the Subject Property consists of limestone, shaley limestone, and dolostone, which includes the Maquoketa Formation, and the Stewartville, Prosser, and Cummingsville Formations of the Galena Group (USGS).

3.3.3 Hydrogeology

The general direction of regional groundwater flow in the area of the Subject Property is presumed to be to the north-northwest toward the Straight River (USGS Ellendale, MN topographic map). Local conditions may vary due to surface water features, perched groundwater conditions or artificially created drainage systems.

4.0 User Provided Information

4.1 TITLE RECORD INFORMATION

Wenck was provided a copy of a title insurance commitment on the Subject Property prepared by the Old Republic National Title Insurance Company, with a Commitment Date of January 18, 2019. The document provided a legal description of the Subject Property and utility easements. The document did not indicate any environmental restrictions against the Subject Property.

4.2 USER QUESTIONNAIRE

User provided information includes a copy of the ASTM User Questionnaire completed by Ms. Erin Heitkamp, Managing Director-Strategy, Sustainability & Assurance of Pipeline Foods. The following sections include the information obtained from the completed User Questionnaire, which is included in **Appendix A**.

4.2.1 Environmental Liens or Activity and Use Limitations

No independent review of environmental liens was undertaken by Wenck as a part of this scope of work. Pipeline ordered and is reviewing title insurance commitments for the Subject Property.

4.2.2 Specialized Knowledge

Prior assessments regarding the Subject Property were provided by Gray Plant Mooty during preparation of this ESA (See Section 5.4). In addition, see Section 6.0 and Section 7.0 for specialized knowledge regarding the Subject Property.

4.2.3 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable environmental information was found relevant to this study, which is discussed throughout this ESA.

4.2.4 Valuation Reduction for Environmental Reasons

No valuation reduction for environmental reasons was disclosed at the outset of this study.

4.3 OWNER, PROPERTY MANAGER AND OCCUPANT INFORMATION

The Subject Property is owned and occupied by SunOpta, Inc. The Subject Property Representative, Mr. LaVerne Klecker, SunOpta Grain Manager, provided access and a tour of the Subject Property.

4.4 REASON FOR PERFORMING PHASE I ESA

Wenck Understands Pipeline Foods is considering purchasing the Subject Property. This Phase I ESA is being performed as a component of due diligence activities and to determine whether RECs, CRECs or HRECs affect the Subject Property.

5.0 Records Review

5.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Wenck requested and reviewed a search of files from federal and state databases from GeoSearch for the Subject Property (the GeoSearch Radius Report). Files were searched from Federal and State environmental records databases within minimum search distances as specified in the ASTM Phase I Standard, and the GeoSearch Radius Report included a more extensive database list than those minimally identified as required by the ASTM Phase I Standard. A summary of the sites identified in the GeoSearch Radius Report are discussed below, along with information regarding the significance of the listing for the Subject Property. The GeoSearch Radius Report, which contains more information regarding database descriptions and search distances, is included in **Appendix B**.

5.1.1 Subject Property

The Subject Property **was** identified on several reviewed regulatory databases in the GeoSearch Radius Report for Central Co-op and Central Valley Co-op:

- ▲ Registered Leaking Storage Tanks (LUAST)
- ▲ Agricultural Spills Listing (AGSPILLS) – 2 listed
- ▲ Facility Registry System (FRSMN)
- ▲ Bulk Storage Permits (BULKSTORAGE)
- ▲ What's In My Neighborhood (WIMN)

The LUAST identified was the Central Co-op Dry Fertilizer Plant site (MPCA Leak Site file 15985) located on the Subject Property's southern Parcel 2. The GeoSearch Radius Report lists the site as being on the Subject Property. A release of fuel oil 1 and 2 was reported in January 2005. The file was granted regulatory closure by the MPCA in June 2006. A closure letter does not eliminate the possibility of residual contamination at the site. Based on the regulatory agency closure of the LUAST, this listing is considered to represent a CREC for the Subject Property.

The Subject Property was reported in the AGSPILLS listings are for the Central Co-op located on the Subject Property south of the southern Parcel 2. Each of the listings are reported as pesticides and fertilizer contamination and have been closed, one in June 2007, and the other in April 2009. Based on the regulatory closure status provided, these listings are considered to represent a CREC for the Subject Property.

The BULKSTORAGE database is sites that have an active or discontinued bulk storage permit. This listing is for the Central Valley Co-op facility located south of the southern Parcel 2. The permit is listed as discontinued for fertilizer and pesticides. Due to the type of database, this listing is not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, is not considered to represent a REC, for the Subject Property.

FRSMN and WIMN database are not indicative of a release or a material threat of release of petroleum products or potentially hazardous substances at the facility. Rather, these databases are pointers to other databases that may speak to environmental licenses or records or, in certain cases, releases. In general, these databases are compendia of other record sources.

5.1.2 Surrounding Properties

Additional mapped sites of regulatory interest identified within the search radii defined by the ASTM Phase I Standard, as identified in the GeoSearch Radius Report, include the following:

Number of Sites	Regulatory Database	Comments
3	Facility Registry System (FRS) sites	<p>The FRS database includes pointers to other databases and listings, which are discussed in further detail below.</p> <p>Due to the type of database, these listing are not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, are not considered to represent RECs, CRECs or HRECs for the Subject Property.</p>
2	Resource Conservation and Recovery Act – Non-Generator Facilities (RCRANGR05) sites	<p>The closest RCRANGR05 site is NRHEG Middle School, located at 200 School Street. The mapped location is adjacent to the east of the northern Parcel 1. However, the current NRHEG school is located south of the Subject Property. The listing is in reference to the former generation of ignitable (D001) waste. No corrective action, violations, or enforcements were listed for the site.</p> <p>These listings are not considered to represent RECs, CRECs or HRECs for the Subject Property based on the type of database and the lack of reported violations, and/or corrective action.</p>
1	Permitted by Rule Landfills (PBRLF)	<p>The PBRLF site is the Ellendale Recycling Center, which is adjacent to the south of the southern Parcel 2. According to the MPCA website, a permit-by-rule (PBR) facility does not need to obtain a solid waste permit since it meets the eligibility criteria of being small and/or operates for a short-time (<15,000 cubic yards per year). The Ellendale Recycling Center is listed as a yard waste composting PBR and recycling PBR. There are no reported violations or releases for the facility.</p>

Number of Sites	Regulatory Database	Comments
		Based on the database listing and lack of reported violations or releases, this listing is not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, is not considered to represent a REC, CREC or HREC for the Subject Property.
1	Tier Two Facility sites (TierII)	<p>The Tier II facility is Central Farm Service – Ellendale and is located adjacent to the north of the northern Parcel 1. Tier II sites are facilities that store hazardous materials at or above established EPA threshold amounts. The Central Farm Service – Ellendale facility is listed as reporting storing propane from 2010 through 2017. The facility is listed as active and the propane tanks were observed during the site reconnaissance. However, from 2010 to 2014, the average daily amount of propane was reported as 160,000 pounds and from 2015 to 2017, the reported amount was 10 pounds. No releases have been reported for the facility.</p> <p>Based on the information reviewed in the GeoSearch Radius Report, this listing is not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, is not considered to represent a REC, CREC or HREC for the Subject Property.</p>
4	Registered Storage Tank (UAST) sites	UAST sites are not necessarily indicative of a release or a material threat of release, therefore, these listings are not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, are not considered to represent RECs, CRECs or HRECs for the Subject Property. Registered Leaking UAST sites are discussed below.
5	Agricultural Spills Listing (AGSPILLS) sites	Each of the five AGSPILLS sites are located at least 0.04 miles from the Subject Property at either a side-gradient or down-gradient locations, with respect to anticipated groundwater flow direction. The identified AG SPILLS sites received regulatory closure from the MDA in 2005, 2007, 2010 and 2013. Based on the locations and/or status, these listings are not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, are not considered to represent RECs, CRECs or HRECs for

Number of Sites	Regulatory Database	Comments
		the Subject Property.
5	Registered Leaking Storage Tank (LUAST) sites	The five LUAST sites have been granted regulatory closure by the MPCA and are not located adjacent to the Subject Property. Based on regulatory status of each site and the information provided in the GeoSearch Radius Report, these remaining listings are not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, are not considered to represent RECs, CRECs or HRECs for the Subject Property.
1	Agricultural Contingency sites (CONTINGENCIES)	The CONTINGENCIES site identified is Polar Chemical & Gas and is located 0.042 miles west of the Subject Property. The site is listed as having soil contamination only and no plume of contamination. Based on the locations with respect to the presumed direction of groundwater flow and the information provided in the GeoSearch Radius Report, this listing is not considered a threat to soil, groundwater and/or soil vapor conditions at the Subject Property, and, therefore, is not considered to represent a REC, CREC or HREC for the Subject Property.
19	What's In My Neighborhood (WIMN) Database	The WIMN database includes pointers to other databases, facilities of potential regulatory interest, and facilities that were entered into the MPCA's online WIMN database. A listing in the WIMN database, by itself, is not indicative of a release or a material threat of release of petroleum products or potentially hazardous substances. These listings are not considered to represent RECs, CRECs or HRECs for the Subject Property based on the type of database.

Six unmapped sites were identified in the GeoSearch Radius Report. Unmapped sites are those where address information is insufficient to allow the sites to be accurately mapped by GeoSearch. The Central Coop BULKSTORAGE, Central Co-op PCASPILLS are related to the listings for the Subject Property discussed above in Section 5.1.1.

Based on information reviewed from the MPCA WIMN online database Wenck was able to ascertain that the remaining sites (Ellendale Farmer Coop – FRSMN; Flowers and More by Lorna – UAST/WIMN; and Union Pacific Railroad Derailment Response – WIMN) are not directly associated with or directly adjacent to the Subject Property. Based on database listings, these sites are not considered a threat to soil, groundwater or soil vapor conditions at the Subject Property, and, therefore, are not considered to represent RECs for the Subject Property.

Wenck did not review State/County/City files for these database listings because sufficient information was available from other sources to determine the potential for RECs, CRECs and/or HRECs relative to the Subject Property.

5.2 ADDITIONAL RECORD SOURCES

Additional record sources may be consulted when, in the judgment of the Environmental Professional, such additional records are reasonably ascertainable, sufficiently useful, accurate and complete, and are generally obtained pursuant to good commercial and customary practice. Such records may include local brownfield lists, or other local lists similar to those federal, state and tribal lists. Such sources may include local health or environmental departments, fire departments, planning departments, building permit or inspection departments, and other local pollution, water quality or utility companies.

5.2.1 Steele County Tax Information

Steele County tax information was obtained and reviewed from the Steele County tax assessor’s website. Tax records provide publicly available information about the Subject Property. The tax records did not reveal any additional information with respect to the environmental condition of the Subject Property.

The Steele County tax information is included as **Appendix C**.

5.2.2 Local Building Records Review

Local building records were obtained from the Steele County tax assessor. According to the building records, the Subject Property building was constructed in 1938. Information obtained from the Steele County tax assessor is included in **Appendix C**.

5.3 HISTORICAL USE INFORMATION

5.3.1 Aerial Photographs

Aerial photographs were reviewed from 1938, 1949, 1951, 1958, 1964, 1971, 1982, 1986, 1991, 1998, 2002, 2008, 2013, and 2015. The aerial photographs are presented in **Appendix D**.

Year	Description
1938-1958	<p>In 1938 through 1958 aerial photographs, the Subject Property appears to be developed with a feed mill and warehouse on the northern Parcel 1 and two additional structures on the southern Parcel 2.</p> <p>Surrounding, adjacent sites appear to consist of vacant and/or agricultural cropland to the north; vacant and/or agricultural cropland and residential structures to the east; railroad tracks with residential and commercial structures beyond to the west; and 5th Avenue W with residential and commercial structures beyond to the south.</p>

1964-1971	In the 1964 through 1971 aerial photographs, the Subject Property appears generally as described above with the addition of several apparent storage bins or containers on the northern Parcel 1. Surrounding, adjacent sites appear similar to the previous aerial photographs.
1982-2015	In the 1982 through 2015 aerial photographs, the Subject Property appears to be in the current configuration. Surrounding, adjacent sites appear similar to the previous aerial photographs. A commercial building is visible adjacent to the east in the 2002 aerial photograph.

5.3.2 City Directories

City directories were researched for the Subject Property and surrounding properties. The street researched was 5th Avenue and directories were available for the years 1998, 2003, 2009, 2013, and 2018. The city directories are included as **Appendix E**. Listings for the address of the Subject Property (100 5th Avenue E) consist of the following:

Directory Year	Subject Property Listing
1998	No listing
2003	No listing
2009	No listing
2013	No listing
2018	No listing

Other listings in the vicinity of the Subject Property include: a truck repair shop at 110 5th Avenue W and other commercial and residential listings.

5.3.3 Historical Maps

The Ellendale, Minnesota USGS 7.5-minute series topographic maps dated 1967, 2013, and 2016 show the area of the Subject Property.

Three structures on the northern Parcel 1 and one structure on the southern Parcel 2 are depicted on the Subject Property on the 1967 topographic map. The railroad tracks west of the Subject Property are shown on each of the maps reviewed and the buildings west of the Subject Property and south beyond 5th Avenue that were noted in the 1938 through 2015 aerial photographs are apparent the 1967 topographic map. The 2013 and 2016 topographic maps do not depict any structures.

Additionally, three real estate atlases for the year 1855, 1897 and 1914 were reviewed. The atlases do not show any structures or other items on the Subject Property or surrounding sites.

The historical maps are included as **Appendix F**.

5.3.4 Fire Insurance Maps

A search was conducted to determine if fire insurance maps were available for the Subject Property. Fire insurance maps were created for insurance underwriters and often contain information regarding the uses of individual structures and the locations of fuel and/or chemical storage tanks that may have been on a particular property.

According to Historical Information Gatherers, Inc. (HIG), fire insurance map coverage is not available in the research materials searched for the Subject Property. HIG fire insurance map research documentation is included as **Appendix G**.

5.4 PREVIOUS ENVIRONMENTAL REPORTS

Previous environmental reports were not provided to Wenck during preparation of this Phase I ESA.

6.0 Subject Property

6.1 SUBJECT PROPERTY OBSERVATIONS

Mr. Ben Conlon of Wenck conducted a site reconnaissance on January 14, 2019. Mr. Conlon was accompanied during the site reconnaissance by the Subject Property Representative, Mr. LaVerne Klecker, SunOpta Grain Manager. Wenck staff visually observed the Subject Property to identify current land use, obtain evidence of past uses, and to identify surface characteristics of the Subject Property for the presence of RECs, CRECs or HRECs. Subject Property photographs are included in **Appendix H**.

The site reconnaissance consisted of visually observing the interior and exterior portions of the Subject Property. Wenck staff observed (from the Subject Property boundaries) the adjoining properties for evidence of RECs, CRECs or HRECs, and for indications of past and current land use.

As noted in Section 3.1, the Subject Property consists of:

- ▲ One main building consisting of an office, grain elevator, truck and rail loading and unloading areas, and an old unused feed mill area commercial building (photograph 4);
- ▲ Two warehouses, one on the northern parcel, attached to the main building (photograph 7, and one on the southern parcel (photographs 13-15);
- ▲ Gravel paved drive areas (photograph 1); and
- ▲ A spur railroad track (photograph 2).

The Subject Property operates as a grain elevator and grain storage facility. The Subject Property has been used since 1938 as a feed mill and grain storage facility. The facility currently receives grain via truck and loads onto trucks only. According to the site representative, the rail spur at the Subject Property has not been used for grain loading or unloading since the property was acquired. According to the site representative and observations made during the site visit, the feed mill area of the main building has not been operational for many years and is visibly starting to deteriorate (photographs 8 and 9). Also, within the main building are thirteen (13) empty cuboid storage bins. These storage bins are currently not in use because the containment walls have holes and cannot keep grain separate.

The two warehouses are currently used for equipment and material storage. Product is not stored in either of the warehouses. General maintenance chemicals were observed in a flameproof cabinet within the northern warehouse as well as welding gas cylinders.

The outdoor grain storage area, located north of the six grain bins on the southeastern portion of the north parcel, is not currently used for grain storage. It is currently used for equipment storage if the equipment does not easily fit into the southern warehouse.

The building is served by utility electric, gas and telephone services. Municipal water and sanitary sewer systems also serve the facility.

6.1.1 Materials Management

Materials managed at the Subject Property include corn and soybean, grain moving equipment, unused equipment, and office materials. Wenck noted chemicals at the Subject Property consist of small quantities of cleaning and maintenance chemicals, paints, and welding gasses.

6.1.2 Solid and Hazardous Waste Management

A vendor-maintained dumpster was noted at the facility to manage solid waste prior to regular collection.

No evidence of hazardous waste generation was noted during the site reconnaissance or documented in the GeoSearch Radius Map Report. The Subject Property Representative stated that he is not aware of any hazardous waste generated on the Subject Property.

6.1.3 Aboveground and Underground Storage Tanks (ASTs/USTs)

Wenck observed no evidence of former or existing ASTs/USTs at the Subject Property. No evidence of former or existing ASTs/USTs was documented in the regulatory database review. The Subject Property Representative stated that he is not aware of current or former ASTs/USTs.

6.1.4 Interior and Exterior Surface Observations

Wenck observed no evidence of soil subsidence, surface staining, pooled liquids, stressed vegetation, fill soil piles or debris piles on the Subject Property.

6.1.5 Pits, Sumps, Oil-Water Separators and Floor Drains

Wenck did not observe any pits, sumps, oil-water separators or floor drains on the Subject Property at the time of the site reconnaissance. The Subject Property Representative stated that he is not aware of any pits, sumps, oil-water separators or floor drains in the Subject Property building.

6.1.6 Wastewater and Stormwater Discharge Systems

The Subject Property is served by the municipal sanitary sewer system. Stormwater that falls on the northern parcel primarily drains via overland flow to the east side of the property towards a municipal drainage ditch that runs north and south. Stormwater that falls on the west side of the road within the southern parcel drains via overland flow to the west toward the railroad. Stormwater that falls on the road within the southern parcel drains via overland flow to the east side of the parcel.

6.1.7 Wells, Drywells and Lagoons

Wenck did not observe the presence of wells, drywells or lagoons at the time of the site reconnaissance. The Subject Property Representative stated that he is not aware of any wells, drywells or lagoons on the Subject Property.

There are no wells listed for the Subject Property on the Minnesota County Well Index.

6.1.8 Polychlorinated Biphenyls (PCBs) and Oil-Containing Equipment

Wenck observed nine pole-mounted transformers on the Subject Property. Six of the pole-mounted transformers are located on the south side of the northern Parcel 1. The other three pole-mounted transformers are located on the east side of the northern Parcel 1. There was no visual indication on the transformer that may indicate PCB content. The pole-mounted transformers did not show any evidence of leaks or spills at the time of the site reconnaissance. According to interview information, the transformer is owned by the local utility company.

7.0 Interviews

7.1 INTERVIEW WITH SUBJECT PROPERTY REPRESENTATIVE

Date of Interview: December 3, 2018
Name: Mr. LaVerne Klecker
Affiliation: SunOpta Grain Manager
Years familiar with Subject Property: Since approximately 2004 when the property was purchased
Telephone Number: 507-451-6030

Wenck interviewed Mr. Klecker regarding the Subject Property. Mr. Klecker stated that SunOpta acquired the Subject Property in 2009 and operated the facility as a grain elevator grain storage facility from approximately 2009. Mr. Klecker provided information to Wenck that is included throughout this report. Mr. Klecker stated that he is was not aware of any current or previous environmental concerns involved with the Subject Property.

7.2 INTERVIEW WITH LOCAL GOVERNMENT OFFICIAL

Date of Interview: N/A
Name: Representative
Affiliation: Ellendale Fire Department
Telephone Number: 507-684-9800

The Subject Property is in the jurisdiction of the Ellendale Fire Department. Wenck attempted several times to contact the Ellendale Fire Department but were unable to reach anyone to interview about the possibly presence of any AST or UST for chemical storage or chemical releases at the Subject Property.

8.0 Evaluation

8.1 DATA GAPS

Historical information was reviewed back to 1855. Data gaps greater than five years exist from prior to 1855, from 1855 to 1897, from 1897 to 1914, 1914 to 1938, 1938 to 1949, 1951 to 1958, 1958 to 1964, 1971 to 1982, and from 1991 to 1998.

The interviews, historical maps, city directories, fire insurance maps, aerial photographs, and previous environmental reports provide generally good corroborating information that allows an understanding of historical Subject Property use, therefore the data gaps do not affect our conclusion. A research summary is included as **Appendix I**.

Wenck considers the evaluation of the presence of RECs, CRECs, and HRECs to be complete, based on the lack of identified changes in land use during the periods affected by any data gaps of more than five years. Therefore, we do not recommend additional investigation relative to the resolution of those data gaps, as we do not believe it would impact our conclusions.

8.2 IDENTIFIED FINDINGS

Wenck was authorized by Gray Plant Mooty, representing Pipeline Foods to conduct this Phase I Environmental Site Assessment (ESA) of the property and improvements located at 100 5th Avenue (Highway 30) and 504 Commercial Street, Ellendale, Steele County, Minnesota; the Subject Property. The Subject Property consists of 3.43 acres occupied by grain processing and storage, with a gravel parking lot and drive areas, and a spur railroad track. Access to the Subject Property is from 5th Avenue.

The Subject Property is an agricultural grain processing and storage facility that is currently in use. According to reviewed sources of information, the Subject Property was undeveloped land in agricultural use from at least 1938, when the currently existing commercial building was constructed. The Subject Property was originally used as a feed mill. According to the site representative, a previous occupant of the Subject Property included Central Valley Co-op and Ellendale Co-op.

The LUAST identified was the Central Co-op Dry Fertilizer Plant site (MPCA Leak Site file 15985) located on the Subject Property's southern Parcel 2. The GeoSearch Radius Report lists the site as being on the Subject Property. A release of fuel oil 1 and 2 was reported in January 2005. The file was granted regulatory closure by the MPCA in June 2006. A closure letter does not eliminate the possibility of residual contamination at the site.

The Subject Property was reported in the AGSPILLS listings are for the Central Co-op located on the Subject Property south of the southern Parcel 2. Each of the listings are reported as pesticides and fertilizer contamination and have been closed, one in June 2007, and the other in April 2009.

Observations at the time of the site reconnaissance did not reveal evidence of a release or a material threat of release of petroleum products or potentially hazardous substances as a result of the current use of the Subject Property.

Mapped sites of regulatory interest revealed within the GeoSearch Radius Report did not reveal evidence of a release or a material threat of release to the Subject Property from adjacent or upgradient properties.

The Subject Property is in a commercial, residential and agricultural area of Ellendale.

8.3 OPINIONS

The following opinions are based on the above findings:

- ▲ The LUAST identified was the Central Co-op Dry Fertilizer Plant site (MPCA Leak Site file 15985) located on the Subject Property's southern Parcel 2. The GeoSearch Radius Report lists the site as being on the Subject Property. A release of fuel oil 1 and 2 was reported in January 2005. The file was granted regulatory closure by the MPCA in June 2006. A closure letter does not eliminate the possibility of residual contamination at the site. Based on the regulatory agency closure of the LUAST, this listing is considered to represent a CREC for the Subject Property.
- ▲ The Subject Property was reported in the AGSPILLS listings are for the Central Co-op located on the Subject Property south of the southern Parcel 2. Each of the listings are reported as pesticides and fertilizer contamination and have been closed, one in June 2007, and the other in April 2009. Based on the regulatory closure status provided, these listings are considered to represent a CREC for the Subject Property.
- ▲ Commercial properties are located directly adjacent to the west and south; residential properties directly adjacent to the east; and agricultural cropland directly adjacent to the north of the Subject Property. Based on the type of use and information provided in the GeoSearch Radius Report, the adjacent commercial, residential and agricultural use is not considered to represent a REC, CREC or HREC for the Subject Property.
- ▲ Mapped sites of regulatory interest revealed within the GeoSearch Radius Report are not considered RECs, HRECs, or CRECs. Based on the review of the revealed sites of regulatory interest, including unmapped site listings revealed within search radii defined by the Practice, we identified no material threat of release to the Subject Property from adjacent or upgradient properties.

8.4 CONCLUSIONS

Wenck performed a Phase I ESA in conformance with the scope and limitations of the ASTM Phase I Standard and in accordance with the AAI Rule (40 CFR Part 312) of the property and improvements of 100 5th Avenue East in Ellendale, Steele County, Minnesota. Any exceptions to, or deletions from, the ASTM Phase I Standard are described in Section 2.3 and Section 2.4 of this report.

This ESA has identified no evidence of RECs, CRECs or HRECs in connection with the Subject Property, except the following:

- ▲ A release of fuel oil 1 and 2 was reported in January 2005. The file was granted regulatory closure by the MPCA in June 2006. A closure letter does not eliminate the

possibility of residual contamination at the site. Based on the regulatory agency closure of the LUAST, this listing is considered to represent a CREC for the Subject Property.

- ▲ Reported releases of pesticides and fertilizer contamination and have been closed by the Minnesota Department of Agriculture, one in June 2007, and the other in April 2009. Based on the regulatory closure status provided, these listings are considered to represent a CREC for the Subject Property.

9.0 Non-Scope Considerations

Assessments of potential environmental issues or conditions at the Subject Property that may relate to commercial real estate activities, but were not part of this scope of work include the following:

- ▲ Asbestos Survey
- ▲ Radon Gas Survey
- ▲ Lead-Based Paint Assessment
- ▲ Lead in Drinking Water Evaluation
- ▲ Wetland Delineation
- ▲ Regulatory Compliance Audit
- ▲ Cultural and Historic Resources Review
- ▲ Industrial Hygiene Review
- ▲ Health and Safety Assessment
- ▲ Ecological Resources Evaluation
- ▲ Endangered Species Survey
- ▲ Indoor Air Quality Evaluation
- ▲ Mold Investigation
- ▲ High Voltage Power Lines Assessment

This list is not intended to be all-inclusive and is not intended to imply significance of further investigation into these non-scope items.

11.0 Signature Page

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in 312.10 of 40 CFR Part 312, and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Company Experience

WENCK ASSOCIATES, INC. is a full-service environmental consulting firm that specializes in providing comprehensive environmental, regulatory, and safety guidance for our client's real estate asset protection, redevelopment and development needs. Collectively, Wenck offers our clients over 25 years of experience, depth of technical and regulatory knowledge and expertise in the following service areas:

- ▲ Environmental Assessment Services (Phase I and II)
- ▲ Site Preparation/Planning Services
- ▲ Integrated Site Remediation and Risk-based Response Actions
- ▲ Storage Tank Removal, Replacement and Compliance
- ▲ Stormwater Management Plans and Permitting (NPDES requirements, etc.)
- ▲ Wetlands Delineation and Mitigation
- ▲ Environmental Permitting and Compliance
- ▲ Asbestos and Lead Identification and Abatement
- ▲ Voluntary Cleanup Programs and Guidance on Public Funding Mechanisms for Brownfield Redevelopment
- ▲ Indoor Air Quality Assessment
- ▲ Facility Layout Review for Environmental and Safety Efficiency
- ▲ Environmental Impact Assessments (EIA) and Statements (EIS), Environmental Assessment Worksheets (EAW), Alternative Urban Areawide Review (AUAR)
- ▲ Traffic Engineering
- ▲ Pollution Prevention Plans
- ▲ Greenhouse Gas Services

Wenck strives to provide our clients with strategic, high quality and cost-effective services that are customized to their specific needs. For more extensive information on the services we provide please refer to www.wenck.com.

Individual Bios

Ryan McClure

Mr. McClure has over 10 years of experience as an Environmental Scientist on diverse projects including soil and groundwater remediation and investigation and Phase I and Phase II Environmental Site Assessments. He has worked with both public and private industry throughout the Southeast. Specialties include soil and ground water investigations/remediation and due diligence activities.

Ben Conlon

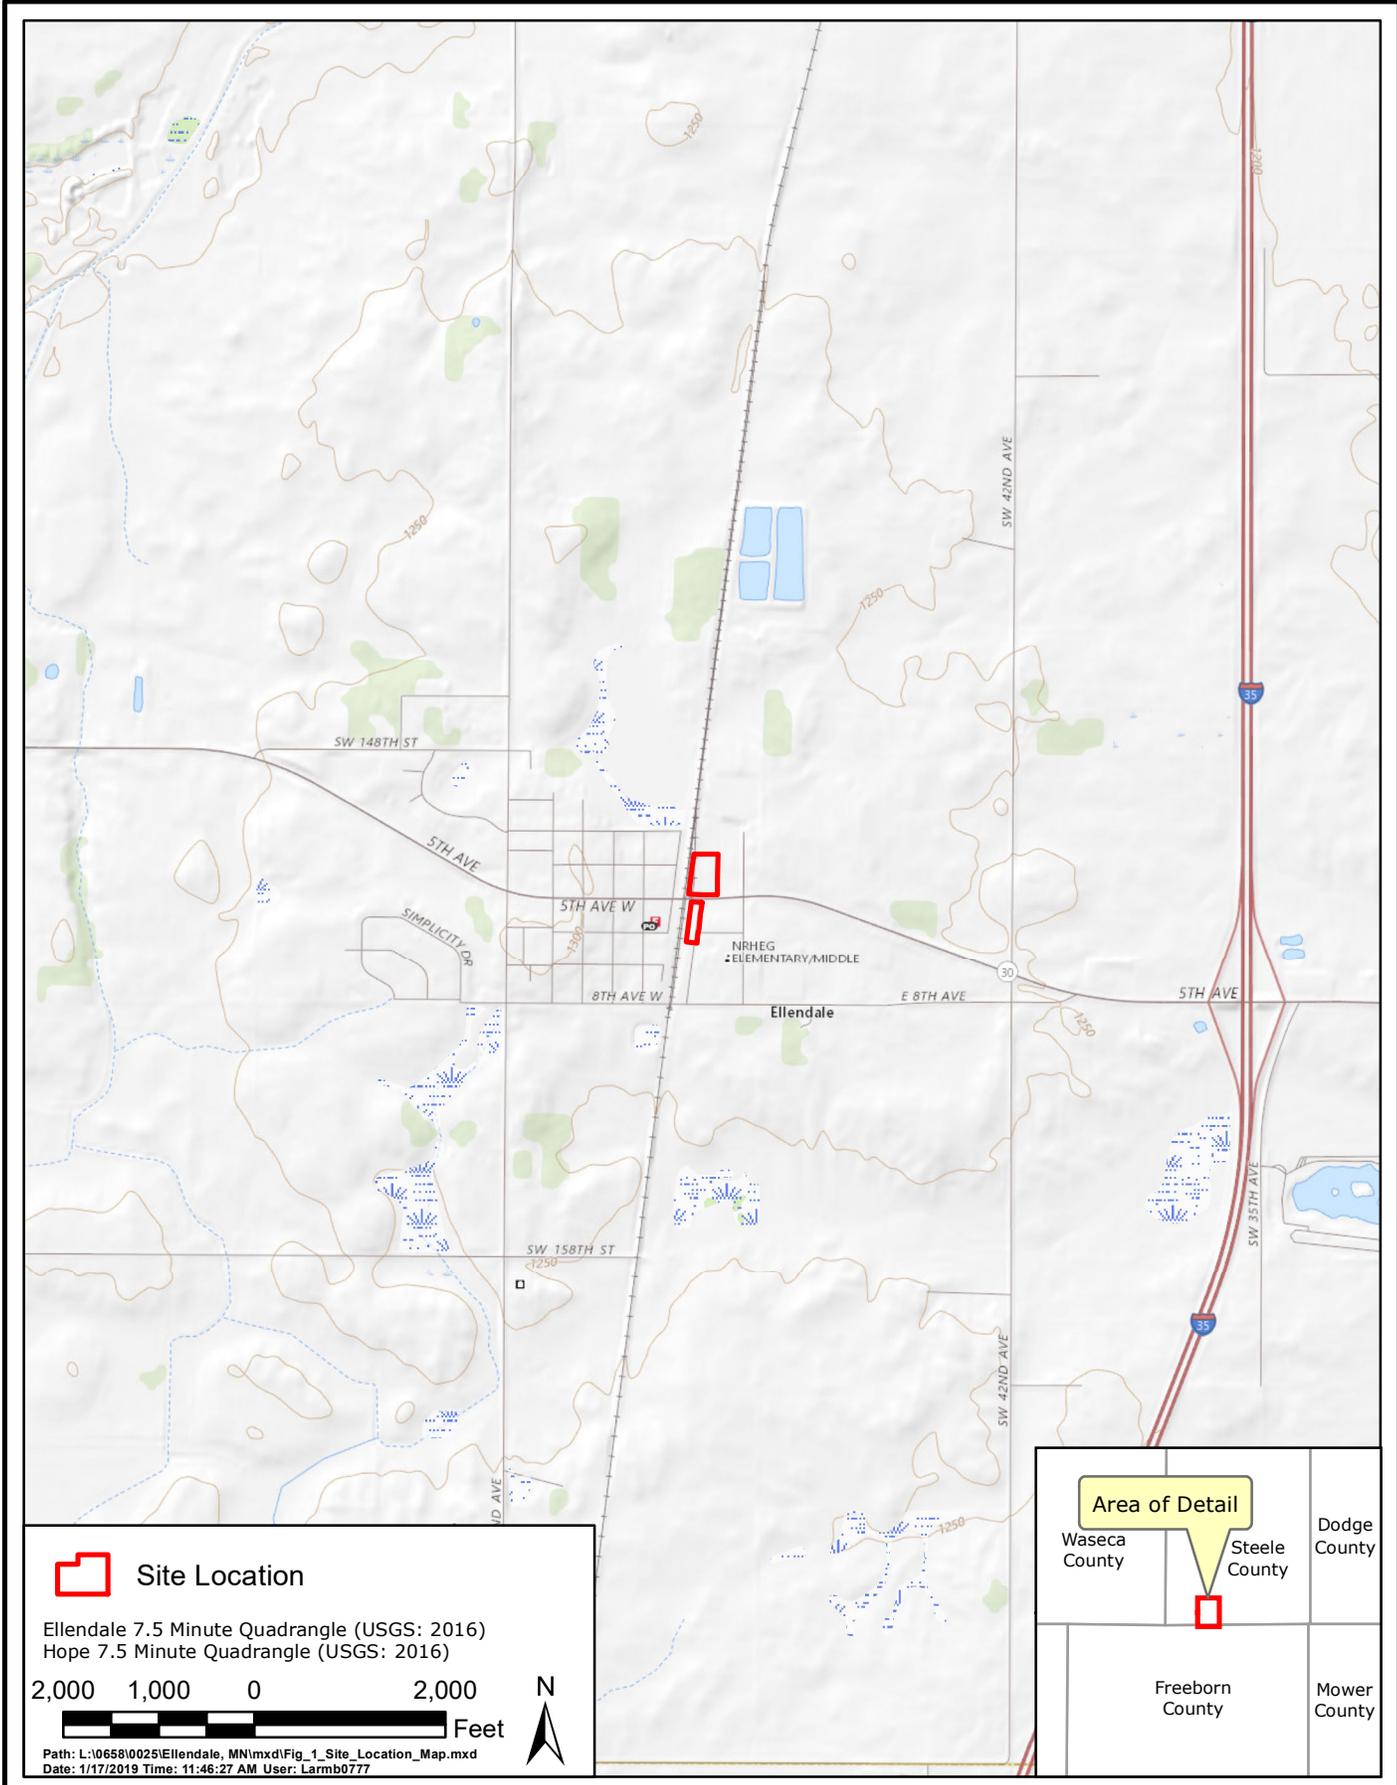

Mr. Conlon has 4 years of experience in environmental, health and safety (EHS) consulting for manufacturing, technology, service and industrial clients. His areas of expertise include the planning, implementation and management of EHS regulatory compliance assurance, EHS management system implementation at both facility and corporate levels, and mergers and acquisitions advisory services. Mr. Conlon is experienced in conducting both small and large multi-site, national projects to a wide variety of corporate, legal, facility and financial institutions.

Aaron Benker

Mr. Benker joined Wenck Associates, Inc. in 2013 and manages the real estate and remediation group. Mr. Benker's experience in environmental consulting provides leadership in the real estate sector with emphasis on development, transactional and remedial projects. Mr. Benker has significant experience assisting a wide variety of clients navigating environmental programs and achieving regulatory compliance. Mr. Benker has managed and worked on projects in several states in the United States and also Canada. Mr. Benker holds a Bachelors of Art in Biology and Environmental Studies from Concordia College in Moorhead, Minnesota.

User Questionnaire

ATSM E 1527-13 USER QUESTIONNAIRE FOR PROSPECTIVE PURCHASER/LESSEE

Property Address: 3824 SW 93rd Street
Ellendale, MN 56026

To meet the all-appropriate inquiry (AAI) standard, the User (people or entities relying on the Phase I) must provide the following information, if they are aware of it. Your response should represent the current collective knowledge of the User (e.g., officers, directors, employees, partners).

• *Environmental cleanup liens (40 CFR 312.25)*

1. Did a search of recorded land title documents identify any environmental liens recorded against the Property?	A title insurance commitment is on order and will be reviewed.
--	---

• *Activity and land use limitations (AULs) (40 CFR 312.26)*

2. Did a search of recorded land title documents identify any activity or use limitations relating to environmental contamination, such as land use restrictions, or engineering or institutional controls on or of record on the Property?	See above.
---	-------------------

• *Specialized knowledge or experience (40 CFR 312.28)*

3. Do you have any special knowledge or experience related to the Property or nearby properties? (For example, are you involved in the same line of business as is conducted on the Property?) If so, please describe.	No.
--	------------

• *Relationship of the purchase price to the fair market value of the Property (40 CFR 312.29)*

4. Does the purchase price for the Property reasonably reflect its fair market value?	Yes.
5. If not, is there a lower purchase price because the Property is or may be contaminated?	N/A.

• *Commonly known information about the Property (40 CFR 312.30)*

Are you aware of information about the Property that would help identify releases or threatened releases --	
6. Do you know the past uses of the Property? (If so, please describe)	No.
7. Do you know specific chemicals that are or were present at the Property? (If so, please describe)	No.
8. Do you know of any spills occurring at the Property? (If so, please describe)	No.
9. Do you know of any environmental cleanups occurring at the Property? (If so, please describe)	No.

• *Obvious or likely contamination at the Property (40 CFR 312.31)*

10. Based on your knowledge and experience, are there any signs of contamination at the Property?	Not that I am aware of.

Environmental Records Definitions - FEDERAL

AIRSAFS Aerometric Information Retrieval System / Air Facility Subsystem

VERSION DATE: 10/20/14

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

BRS Biennial Reporting System

VERSION DATE: 12/31/15

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The Biennial Report captures detailed data on the generation of hazardous waste from large quantity generators and data on waste management practices from treatment, storage and disposal facilities. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

CDL Clandestine Drug Laboratory Locations

VERSION DATE: 10/05/17

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

DOCKETS EPA Docket Data

VERSION DATE: 12/22/05

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location. Please refer to ICIS database as source of current data.

EC Federal Engineering Institutional Control Sites

VERSION DATE: 08/03/15

This database includes site locations where Engineering and/or Institutional Controls have been identified as part

Environmental Records Definitions - FEDERAL

of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination.

ECHOR05 Enforcement and Compliance History Information

VERSION DATE: 09/01/18

The EPA's Enforcement and Compliance History Online (ECHO) database, provides compliance and enforcement information for facilities nationwide. This database includes facilities regulated as Clean Air Act stationary sources, Clean Water Act direct dischargers, Resource Conservation and Recovery Act hazardous waste handlers, Safe Drinking Water Act public water systems along with other data, such as Toxics Release Inventory releases.

ERNSMN Emergency Response Notification System

VERSION DATE: 10/28/18

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRSMN Facility Registry System

VERSION DATE: 10/09/18

The United States Environmental Protection Agency's Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

HMIRSR05 Hazardous Materials Incident Reporting System

VERSION DATE: 09/30/18

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation located in EPA Region 5. Region 5 includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

ICIS Integrated Compliance Information System (formerly DOCKETS)

VERSION DATE: 09/01/18

Environmental Records Definitions - FEDERAL

ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

ICISNPDES Integrated Compliance Information System National Pollutant Discharge Elimination System

VERSION DATE: 07/09/17

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States. This database is provided by the U.S. Environmental Protection Agency.

LUCIS Land Use Control Information System

VERSION DATE: 09/01/06

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

MLTS Material Licensing Tracking System

VERSION DATE: 06/29/17

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements. Disclaimer: Due to agency regulations and policies, this database contains applicant/licensee location information which may or may not be related to the physical location per MLTS site.

NPDES05 National Pollutant Discharge Elimination System

VERSION DATE: 04/01/07

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States. The NPDES database was collected from the U.S. Environmental Protection Agency (EPA) from December 2002 through April 2007. Refer to the PCS and/or ICIS-NPDES database as source of current data. This database includes permitted facilities located in EPA Region 5. This region includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

PADS PCB Activity Database System

VERSION DATE: 09/14/18

Environmental Records Definitions - FEDERAL

PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the U.S. Environmental Protection Agency of such activities.

PCSR05 Permit Compliance System

VERSION DATE: 08/01/12

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels. This database includes permitted facilities located in EPA Region 5. This region includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin. PCS has been modernized, and no longer exists. National Pollutant Discharge Elimination System (ICIS-NPDES) data can now be found in Integrated Compliance Information System (ICIS).

RCRASC RCRA Sites with Controls

VERSION DATE: 11/21/18

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities with institutional controls in place.

SEMSLIENS SEMS Lien on Property

VERSION DATE: 08/13/18

The U.S. Environmental Protection Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs. This is a listing of SEMS sites with a lien on the property.

SFLIENS CERCLIS Liens

VERSION DATE: 06/08/12

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of

Environmental Records Definitions - FEDERAL

these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete. Please refer to the SEMSLIENS database as source of current data.

SSTS Section Seven Tracking System

VERSION DATE: 02/01/17

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

TRI Toxics Release Inventory

VERSION DATE: 12/31/16

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal and tribal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

TSCA Toxic Substance Control Act Inventory

VERSION DATE: 12/31/12

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and importer site.

RCRAGR05 Resource Conservation & Recovery Act - Generator

VERSION DATE: 12/17/18

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities currently generating hazardous waste. EPA Region 5 includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

Environmental Records Definitions - FEDERAL

RCRANGR05 Resource Conservation & Recovery Act - Non-Generator

VERSION DATE: 12/17/18

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities classified as non-generators. Non-Generators do not presently generate hazardous waste. EPA Region 5 includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

ALTFUELS Alternative Fueling Stations

VERSION DATE: 09/01/18

Nationwide list of alternative fueling stations made available by the U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Bio-diesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE).

FEMAUST FEMA Owned Storage Tanks

VERSION DATE: 12/01/16

This is a listing of FEMA owned underground and aboveground storage tank sites. For security reasons, address information is not released to the public according to the U.S. Department of Homeland Security.

HISTPST Historical Gas Stations

VERSION DATE: NR

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

ICISCLEANERS Integrated Compliance Information System Drycleaners

VERSION DATE: 09/01/18

This is a listing of drycleaner facilities from the Integrated Compliance Information System (ICIS). The U.S. Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

MRDS Mineral Resource Data System

VERSION DATE: 03/15/16

Environmental Records Definitions - FEDERAL

MRDS (Mineral Resource Data System) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS.

MSHA Mine Safety and Health Administration Master Index File

VERSION DATE: 08/31/18

The Mine dataset lists all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970. It includes such information as the current status of each mine (Active, Abandoned, NonProducing, etc.), the current owner and operating company, commodity codes and physical attributes of the mine. Mine ID is the unique key for this data. This information is provided by the United States Department of Labor - Mine Safety and Health Administration (MSHA).

BF Brownfields Management System

VERSION DATE: 10/01/18

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. The United States Environmental Protection Agency maintains this database to track activities in the various brown field grant programs including grantee assessment, site cleanup and site redevelopment. This database included tribal brownfield sites.

NLRRCRAT No Longer Regulated RCRA Non-CORRACTS TSD Facilities

VERSION DATE: 12/17/18

This database includes RCRA Non-Corrective Action TSD facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly treated, stored or disposed of hazardous waste.

ODI Open Dump Inventory

VERSION DATE: 06/01/85

The open dump inventory was published by the United States Environmental Protection Agency. An "open dump" is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

RCRAT Resource Conservation & Recovery Act - Non-CORRACTS Treatment, Storage & Disposal Facilities

VERSION DATE: 12/17/18

Environmental Records Definitions - FEDERAL

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities recognized as hazardous waste treatment, storage, and disposal sites (TSD).

SEMS Superfund Enterprise Management System

VERSION DATE: 12/12/18

The U.S. Environmental Protection Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs.

SEMSARCH Superfund Enterprise Management System Archived Site Inventory

VERSION DATE: 12/13/18

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System Archived Site Inventory (List 8R Archived) replaced the CERCLIS NFRAP reporting system in 2015. This listing reflects sites at which the EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program.

SMCRA Surface Mining Control and Reclamation Act Sites

VERSION DATE: 09/14/18

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

USUMTRCA Uranium Mill Tailings Radiation Control Act Sites

VERSION DATE: 03/04/17

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Environmental Records Definitions - FEDERAL

DNPL Delisted National Priorities List

VERSION DATE: 11/14/18

This database includes sites from the United States Environmental Protection Agency's Final National Priorities List (NPL) where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL, and final publication in the Federal Register has occurred.

DOD Department of Defense Sites

VERSION DATE: 12/01/14

This information originates from the National Atlas of the United States Federal Lands data, which includes lands owned or administered by the Federal government. Army DOD, Army Corps of Engineers DOD, Air Force DOD, Navy DOD and Marine DOD areas of 640 acres or more are included.

FUDS Formerly Used Defense Sites

VERSION DATE: 06/01/15

The Formerly Used Defense Sites (FUDS) inventory includes properties previously owned by or leased to the United States and under Secretary of Defense Jurisdiction, as well as Munitions Response Areas (MRAs). The remediation of these properties is the responsibility of the Department of Defense. This data is provided by the U.S. Army Corps of Engineers (USACE), the boundaries/polygon data are based on preliminary findings and not all properties currently have polygon data available. **DISCLAIMER:** This data represents the results of data collection/processing for a specific USACE activity and is in no way to be considered comprehensive or to be used in any legal or official capacity as presented on this site. While the USACE has made a reasonable effort to insure the accuracy of the maps and associated data, it should be explicitly noted that USACE makes no warranty, representation or guaranty, either expressed or implied, as to the content, sequence, accuracy, timeliness or completeness of any of the data provided herein. For additional information on Formerly Used Defense Sites please contact the USACE Public Affairs Office at (202) 528-4285.

FUSRAP Formerly Utilized Sites Remedial Action Program

VERSION DATE: 03/04/17

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Environmental Records Definitions - FEDERAL

NLRRCRAC No Longer Regulated RCRA Corrective Action Facilities

VERSION DATE: 12/17/18

This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

NMS Former Military Nike Missile Sites

VERSION DATE: 12/01/84

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

NPL National Priorities List

VERSION DATE: 11/14/18

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

PNPL Proposed National Priorities List

VERSION DATE: 11/14/18

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

RCRAC Resource Conservation & Recovery Act - Corrective Action Facilities

VERSION DATE: 12/17/18

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems

Environmental Records Definitions - FEDERAL

that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities with corrective action activity.

RCRASUBC Resource Conservation & Recovery Act - Subject to Corrective Action Facilities

VERSION DATE: 12/17/18

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities subject to corrective actions.

RODS Record of Decision System

VERSION DATE: 08/13/18

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.

Environmental Records Definitions - STATE (MN)

AIRS Permitted Air Facilities

VERSION DATE: 08/01/18

This database contains facilities with air permits issued by the by the Minnesota Pollution Control Agency. These permits identify the units at each facility that generate air pollutants and, where applicable, the limits on those emissions. In some cases a permit may also authorize construction or modification of a facility.

CDL Clandestine Drug Laboratory Locations

VERSION DATE: 07/30/18

This listing of clandestine methamphetamine laboratories is provided by the Minnesota Department of Health. Each meth lab, spill or dump is a potential hazardous waste site, requiring assessment and remediation by experienced and qualified personnel. Former meth lab sites are being cleaned (or remediated) in many Minnesota communities. In these communities, the cleanups are being guided by city and county ordinances, local housing laws, and Minnesota Statute 145A, the Public Health Nuisance Statute.

FEEDLOT Feedlots

VERSION DATE: 08/02/18

Feedlots may be small farms or large-scale commercial livestock operations. They are places where animals are confined for feeding, breeding or holding. The Minnesota Pollution Control Agency (MPCA) and its county partners place requirements on how manure is managed at feedlots, so that it does not contaminate nearby surface water and groundwater.

PCASPILLS Spills Listing

VERSION DATE: 11/16/18

The Minnesota Pollution Control Agency's Emergency Response Team maintains this listing of reported petroleum product, hazardous substance, and/or other spills.

SWUP Solid Waste Utilization Projects

VERSION DATE: 08/02/18

According to the Minnesota Pollution Control Agency, a solid waste utilization project uses certain wastes in a new way to recycle the material instead of putting it into a landfill. An example is using tires to create furniture. The beneficial use of waste products saves landfill capacity for materials that do not have alternative uses. By using solid waste, individuals and organizations can reduce disposal costs, or even generate profit through the sale of materials that have a beneficial use.

TIERII Tier Two Facility Listing

VERSION DATE: 05/11/18

Environmental Records Definitions - STATE (MN)

The Minnesota Department of Public Safety's Emergency Planning and Community Right-to-Know Act Program (EPCRA) maintains this listing of Tier Two facilities which store hazardous chemicals on-site. These facilities subject to EPCRA reporting submit Tier II forms which provide information such as the Material Safety Data Sheet (MSDS) chemical or common name, emergency contact information, approximate amount of chemical stored, along with the location of the chemical at the facility.

WDP Water Discharge Permits

VERSION DATE: 08/01/18

This Minnesota Pollution Control Agency (MPCA) database includes the following types of water permits: Construction Stormwater Permits, Construction Stormwater Site Subdivisions, Industrial Stormwater Permits, MS4 Projects, and Wastewater Dischargers. A construction stormwater permit is designed to limit pollution during and after construction by controlling the erosion associated with construction activities. A construction stormwater site subdivision is a site where a construction project with an existing stormwater permit has been sub-divided into smaller parcels. Industrial stormwater permits are designed to limit the amount of harmful contaminants that reach surface water and groundwater, by requiring good practices for storing and handling materials. A Municipal Separate Storm Sewer System (MS4) is a system of conveyances - such as gutters, ditches, city streets and storm drains - which is used as a path for stormwater. Regulated MS4s cover large areas, and are owned or operated by a public entity such as a city, county, township, watershed district or university. A wastewater discharger is a facility that generates or treats wastewater for discharge onto land or into water.

BULKSTORAGE Bulk Storage Permits

VERSION DATE: 08/26/18

The Minnesota Department of Agriculture's Licensing Information System (LIS) lists individuals or companies who hold licenses, certificates and/or permits required by state law and regulated by the Department. This database only contains those LIS licenses related to anhydrous ammonia storage facilities and bulk pesticide/fertilizer storage facilities. Please note the data is real time and therefore constantly changing.

CLEANERS Registered Drycleaning Facilities

VERSION DATE: 02/27/17

The Minnesota Pollution Control Agency maintains this listing of registered dry cleaning facilities.

IC Sites with Institutional Controls

VERSION DATE: 10/30/18

Institutional controls are defined by Minnesota Statute, Section 115B.02, subdivision 9a, as legally enforceable restrictions, conditions, or controls on the use of real property, ground water, or surface water located at or adjacent to a facility where response actions are taken that are reasonably required to assure that the response actions are protective of public health or welfare or the environment. Institutional controls include restrictions,

Environmental Records Definitions - STATE (MN)

conditions, or controls enforceable by contract, easement, restrictive covenant, statute, ordinance, or rule, including official controls such as zoning, building codes, and official maps. An affidavit required under section 115B.16, subdivision 2, or similar notice of a release recorded with real property records is also an institutional control.

PBRLF Permitted By Rule Landfills

VERSION DATE: 10/30/18

According to the Minnesota Pollution Control Agency, a landfill that is permitted by rule is not required to obtain an individual solid waste permit if it meets certain eligibility criteria. However, it must comply with waste management rules and regulations. Landfills may be permitted by rule if they have a small capacity and/or operate for a short period of time.

UAST Registered Storage Tanks

VERSION DATE: 11/16/18

The Registered Storage Tanks Database provides information on aboveground and underground storage tanks registered with the Minnesota Pollution Control Agency. Owners of USTs and ASTs with a capacity of 500 gallons or more which contain petroleum or hazardous substances must notify the MPCA of the existence of these tanks. Tanks not subject to notification include farm and residential motor fuel tanks less than 1,100 gallons; heating oil tanks less than 1,100 gallons; flow-through process tanks; septic tanks; and agricultural chemical tanks. Some of the data included reflects storage tanks reported in the old "TALES" database. New data reported here is from the MPCA's new "TEMPO" database.

AGSPILLS Agricultural Spills Listing

VERSION DATE: 08/27/18

This list of reported spill incidents is provided by the Minnesota Department of Agriculture (MDA). The MDA is the lead agency for response to, and cleanup of, agricultural chemical contamination (pesticides and fertilizers) in Minnesota. The MDA has grouped these spills into three categories: Old Emergencies, Small Spills and Investigations, and Investigations Boundaries. Old Emergencies represent emergencies which were closed prior to March 1, 2004. These files and the locations plotted have not been reviewed for accuracy and completeness. Small Spills and Investigations represent the location of small spills and investigations, which were closed after March 1, 2004. Investigation Boundaries represent the approximate extent of large spills and other types of facility investigations. Facility Investigations are further subdivided into the following program areas: Awaiting Prioritization Investigation files of known or potential agricultural chemical contamination that are waiting to be prioritized; Prioritized Investigation files of known or potential agricultural chemical contamination that have been prioritized and are awaiting activation; Comprehensive Facility Investigation/MERLA Investigation files of known or potential agricultural chemical contamination that have been activated in MDA's Comprehensive Facility Investigation Program or are active Superfund sites under MDA's oversight; AgVIC Investigation files of known or potential agricultural chemical contamination that have enrolled in the MDA's Agricultural Voluntary Investigation and Cleanup (AgVIC) Program; and Agricultural Chemical Emergency Response Investigation files that were reported as emergency spills of agricultural chemicals and are large enough in size to be represented by a

Environmental Records Definitions - STATE (MN)

polygon.

CAFO Concentrated Animal Feeding Operations

VERSION DATE: 10/01/18

A Concentrated Animal Feeding Operation (CAFO) is any feeding operation with a capacity of 1,000 or more animal units according to federal animal unit calculations. The Minnesota Pollution Control Agency can also define a facility with less than 1,000 animal units as a CAFO on a case-by-case basis, depending on site conditions, and if manure or process wastewater is directly discharged to waters of the state. Facilities that are CAFOs must comply with both federal regulations and state rules. Two or more feedlots under common ownership are considered a single facility if they adjoin each other or use the same manure storage or disposal system.

CLF Closed Landfills

VERSION DATE: 12/09/18

This database includes closed solid waste facilities and sites that have been entered into the PCA's Closed Landfill Program (CLP). The CLP is a voluntary program established by the legislature in 1994 to properly close, monitor, and maintain Minnesota's closed municipal sanitary landfills. Any MPCA-permitted mixed-municipal solid waste landfill that stopped accepting mixed municipal solid waste (MMSW) by April 9, 1994, and demolition debris before May 1, 1995, can qualify for application to this program.

CONTINGENCIES Agricultural Contingency Sites

VERSION DATE: 09/27/18

The Minnesota Department of Agriculture (MDA) Incident Response Unit (IRU) is the state lead agency for the investigation and remediation of incidents involving agricultural chemicals (pesticides and fertilizer). This MDA IRU database includes sites with a soil or ground water contingency, deed restriction, local ordinance, restrictive covenant or deed affidavit in place. The accuracy of these sites can be variable. In most cases, the site boundaries should be considered as only representing the vicinity of the soil or ground water contingency area or plume.

LUAST Registered Leaking Storage Tanks

VERSION DATE: 11/30/18

The Minnesota Pollution Control Agency maintains this listing of leaking aboveground and underground storage tanks. Tank owners are required to immediately report a leak or spill of more than five gallons of petroleum, or any amount of a hazardous substance, from any tank or piping. All leaks and spills from USTs and ASTs and associated piping must be cleaned up to protect the environment and public health. In April of 2016, the MPCA Remediation Programs began utilizing a new data management system and completed this transition in 2018. Please note that select data may be incomplete for sites migrated from the prior data management system, refer to LUAST2016 as an additional leaking storage tank data source.

Environmental Records Definitions - STATE (MN)

LUAST2016

Registered Leaking Storage Tanks Prior to April 2016

VERSION DATE: 04/01/16

The Minnesota Pollution Control Agency maintains this listing of leaking aboveground and underground storage tanks registered with the MPCA through April of 2016. Tank owners are required to immediately report a leak or spill of more than five gallons of petroleum, or any amount of a hazardous substance, from any tank or piping. All leaks and spills from USTs and ASTs and associated piping must be cleaned up to protect the environment and public health. In April of 2016, the MPCA Remediation Programs began utilizing a new data management system and completed this transition in 2018. Please refer to LUAST database as source of current data.

PBF

Petroleum Brownfields Program Sites

VERSION DATE: 11/01/18

This listing of Petroleum Brownfield sites, including those with Development Response Action Plans dated between 2008 and 2012, is provided by the Minnesota Pollution Control Agency (MPCA). The Petroleum Brownfields Program (formerly VPIC) provides the technical assistance and liability assurance needed to facilitate and expedite the development, transfer, investigation and/or cleanup of property that is contaminated with petroleum. Even after cleanup or MPCA file closure most properties will have contamination remaining. State law requires that persons properly manage contaminated soil and water they uncover or disturb - even if they are not the party responsible for the contamination. Property owners, purchasers or developers of property where contaminated soil or water might be encountered may include provisions - called "response actions" - in development plans describing how petroleum contaminated soil and water will be managed if encountered. For some properties, special construction might be needed to prevent the further spreading of the contamination and/or to prevent petroleum vapors from entering buildings or utility access shafts.

PVICP

Potential Voluntary Investigation and Cleanup Program Sites

VERSION DATE: 04/22/16

This listing of Potential Voluntary Investigation and Cleanup Program sites is provided by the Minnesota Pollution Control Agency. These potential sites have not yet entered into the VIC Program until an application has been received at the MPCA.

SAS

State Assessment Sites

VERSION DATE: 10/30/18

State Assessment sites are places that Minnesota Pollution Control Agency (MPCA) Site Assessment staff have investigated because of suspected contamination. The sites investigated include abandoned industrial properties, small commercial businesses and publicly-owned land. (Note that petroleum-contaminated sites are investigated by MPCA Tanks and Leaks staff.) These sites may be referred to the Site Assessment program by the Voluntary Investigation and Cleanup (VIC) program, the Petroleum Remediation program, Minnesota Duty Officer reports or citizen complaints. Site Assessment staff do an initial assessment, and then determine if further action is needed. If a site poses a threat to human health or the environment, it is referred to CERCLIS,

Environmental Records Definitions - STATE (MN)

Superfund, RCRA Cleanup or VIC.

SRS Site Response Section Database

VERSION DATE: 04/22/16

The Minnesota Pollution Control Agency (MPCA) is involved in remediation activities through various programs. Remediation is the process of cleaning up pollution in the soil, water or air. The pollution can result from an accidental spill or from activities that occur over a long time. This MPCA database includes remediation sites from the Superfund, Voluntary Investigation and Cleanup, Brownfields, Resource Conservation and Recovery Act, Tanks, Landfills, and Emergency Response Programs.

SWF Solid Waste Facilities

VERSION DATE: 11/30/18

This list of permitted solid waste facilities is provided by the Minnesota Pollution Control Agency. Solid waste includes mixed municipal solid waste (garbage), construction and demolition debris, and/or industrial solid waste.

UNPERMDUMPS Unpermitted Dump Sites

VERSION DATE: 08/03/18

Unpermitted dump sites are landfills that never held a valid permit from the Minnesota Pollution Control Agency (MPCA). Generally, these dumps existed prior to the permitting program established with the creation of the MPCA in 1967. These dumps are not restricted to any type of waste, but were often old farm or municipal disposal sites that accepted household waste. State assessment staff have investigated many of these dump sites.

VICP Voluntary Investigation and Cleanup Program Sites

VERSION DATE: 12/02/18

The Voluntary Investigation and Cleanup (VIC) Program site listing is provided by the Minnesota Pollution Control Agency. This program encourages timely property transactions by reducing potential health or environmental risks from contamination and promoting the redevelopment of these properties.

WIMN What's In My Neighborhood Database

VERSION DATE: 10/22/18

This online application offers you a way to access a wide variety of environmental information about your community. You can search for: A.) Potentially contaminated sites: Since the early 1980s when major federal and state cleanup programs were created, the MPCA has been aggressively searching for and helping to clean up contaminated properties, from very small to large. This website contains a searchable inventory of those properties, as well as sites that have already been cleaned up and those currently being investigated or cleaned up. B.) Environmental permits and registrations: This Web application also contains a searchable inventory of

Environmental Records Definitions - STATE (MN)

businesses that have applied for and received different types of environmental permits and registrations from the MPCA.

REMSITES MPCA Remediation Sites

VERSION DATE: 11/30/18

This list of Remediation Sites is provided by the Minnesota Pollution Control Agency. In April of 2016, the MPCA Remediation Programs began utilizing a new data management system and completed this transition in 2018. The environmental site types included in this database are Brownfield, Integrated Remediation, Leaking Storage Tank, RCRA Remediation, Superfund, Superfund sub-area, and Site Assessment Sites. Please note that select data may be incomplete for sites migrated from the prior data management system.

SF Superfund Site Information Listing

VERSION DATE: 11/12/18

The Minnesota Pollution Control Agency's Superfund Program identifies, investigates and determines appropriate cleanup plans for abandoned or uncontrolled hazardous waste sites where a release or potential release of a hazardous substance poses a risk to human health or the environment. Superfund does not deal with Resource Conservation and Recovery Act (RCRA) sites or petroleum storage tank releases.

Environmental Records Definitions - TRIBAL

USTR05 Underground Storage Tanks On Tribal Lands

VERSION DATE: 04/12/18

This database, provided by the United States Environmental Protection Agency (EPA), contains underground storage tanks on Tribal lands located in EPA Region 5. Region 5 includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

LUSTR05 Leaking Underground Storage Tanks On Tribal Lands

VERSION DATE: 04/12/18

This database, provided by the United States Environmental Protection Agency (EPA), contains leaking underground storage tanks on Tribal lands located in EPA Region 5. Region 5 includes the following states: Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

ODINDIAN Open Dump Inventory on Tribal Lands

VERSION DATE: 11/08/06

This Indian Health Service database contains information about facilities and sites on tribal lands where solid waste is disposed of, which are not sanitary landfills or hazardous waste disposal facilities, and which meet the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944).

INDIANRES Indian Reservations

VERSION DATE: 01/01/00

The Department of Interior and Bureau of Indian Affairs maintains this database that includes American Indian Reservations, off-reservation trust lands, public domain allotments, Alaska Native Regional Corporations and Recognized State Reservations.

Historical
Information
Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

Historical Aerial Photographs

Aerial photographs of the site location were used to create a multi-page file named AerialPhotos. Each aerial photograph has a title block that includes the year and scale of the photograph as well as project information submitted at the time the order was placed. The years provided are:

1938, 1949, 1951, 1958, 1964, 1971, 1982, 1986, 1991, 1998, 2002, 2008, 2013, 2015

City Directory Pages/Abstracts

Research Methodology: A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

Owatonna 1998-2018

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

Research Results: City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

*5th Avenue East/West (1998-2018) / Highway 30 (no listings in range)
Commercial Street (no listings)*

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. No FIMs or similar maps were identified for the site location and/or adjoining properties.

Database Report

A GeoSearch Radius Report is provided as a file named DBR. Links to the text file, unlocatable report and zip report can be accessed by clicking on the paperclip icon within the GeoSearch report. Key information regarding the database listings is included in a separate Excel spreadsheet named DBRS.

Plat Map+

An online search was conducted for recent plat or parcel maps of the site location and coverage is provided in the file named PropertyMap.

In addition, a search was completed of the HIG Historical Map Collection for historical survey documents and cadastral maps. Maps that cover the site location were provided in a file named HistoricalMaps. The years of coverage provided

are listed below.

1855, 1897, 1914

Topographic Maps

The HIG Historical Map Collection was searched for topographic maps for the site location and adjoining properties. Maps from the HIG Collection were used to create a multi-page file named TopoMaps. The years provided are:

1967, 2013, 2016

Up to four different topographic maps may have been used to create a unified map showing the site location in the center. Unified maps show subdued modern topo features where corresponding maps of the same year were not published. The date in large font on each map is the date HIG has attributed to the map based on the date of first publication, or the most recent date of map inspection or revision. The definitions below provide clarification regarding the dates included in the HIG title block for each map.

Base Map Year - The year when a topographic map was first published or the date the map was significantly revised and given a new base map date.

Photo Year - The date of the most recent aerial photography used to create, revise, or inspect the map.

Photoinspected Year - The year the base map was compared to a more recent aerial photograph. If the comparison showed that no changes were needed, the map was marked photoinspected and no changes were made to the map.

Photorevised Year - During the photo inspection process, if enough changes were observed, the map would be revised by adding the new features. These changes were not field checked and are shown in purple on the photorevised maps.

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist.
