COMPLAINT:

Engine oil leak possilby.

CORRECTION:

AZ Went out, looked at the tractor found it to be over full of oil and out of coolant. Told the customer that the tractor had to come to town. Told customer to change oil and fill with coolant. Customer drove tractor to town but only filled the reservoir. Tractor got hot on the way to town so had to tow machine. Customer also had tech look at the stationary engine. Determined the reason that it got hot was due to the radiator being plugged. Customer was going to clean.

BG Removed hood and shields. Removed fan, shroud and fan drive assembly. Removed intake hoses and air filter housing. Removed starter, disconnected drives and removed engine. Cleaned metal debris from oil pan. Installed new engine. Replaced radiator hoses and intake hoses. Reinstalled previously removed components. Had issues replacing the fan drive coupler due to being rusted. Filled with break in oil and new anti-freeze. Test drove & ran on dyno. Finished assembly and rinsed off.
