16 **OTHER WELL INFORMATION:**

17 Comments: Once rural water was established the well was  
18 no longer used. Prior to rural water the well provided  
19 water to the house and livestock. We had drinking water  
20 hauled in I believe due to the iron taste of the water!

21 **SEALED WELL INFORMATION:** For each well designated as sealed, complete this section.

22 When was the well sealed? \_\_\_\_\_

23 Who sealed the well? \_\_\_\_\_

24 **WELL TYPE:** Use one of the following terms to describe the well type.

- 25 • **WATER WELL:** A water well is any type of well used to extract groundwater for private or public use. Examples  
26 of water wells are: domestic wells, drive-point wells, dug wells, remedial wells and municipal wells.
- 27 • **IRRIGATION WELL:** An irrigation well is a well used to irrigate agricultural lands. These are typically large-  
28 diameter wells connected to a large pressure distribution system.
- 29 • **MONITORING WELL:** A monitoring well is a well used to monitor groundwater contamination. The well is  
30 typically used to access groundwater for the extraction of samples.
- 31 • **DEWATERING WELL:** A dewatering well is a well used to lower groundwater levels to allow for construction or  
32 use of underground spaces.
- 33 • **INDUSTRIAL/COMMERCIAL WELL:** An industrial/commercial well is a nonpotable well used to extract  
34 groundwater for any nonpotable use, including groundwater thermal exchange wells (heat pumps and heat loops).

37 WELL USE STATUS: Indicate the use status of each well.

- 38 • IN USE: A well is "in use" if the well is operated on a daily, regular or seasonal basis. A well in use includes a well
- 39 that operates for the purpose of irrigation, fire protection or emergency pumping.
- 40 • NOT IN USE: A well is "not in use" if the well does not meet the definition of "in use" above and has not been
- 41 sealed by a licensed well contractor.
- 42 • SEALED: A well is "sealed" if a licensed contractor has completely filled a well by pumping grout material
- 43 throughout the entire bore hole after removal of any obstructions from the well. A well is "capped" if it has a metal
- 44 or plastic cap or cover which is threaded, bolted or welded into the top of the well to prevent entry into the well. A
- 45 "capped" well is not a "sealed" well.
- 46 If the well has been sealed by someone other than a licensed well contractor or a licensed well sealing contractor,
- 47 check the well status as "not in use."

48 If you have questions please contact the North Dakota Department of Health at 701-328-4619.

49 Use Location Map form to show the location of well(s) and/or subsurface sewage treatment system on the real property.
